# Table of Contents

This manual covers every function of the Ìsàlèè Èkó operations portal, arranged in operational sequence from morning opening to evening reconciliation.

**Section 1:** Access & Authentication (Logging In, Roles & Security) **Page 3**

**Section 2:** Operations Command Center (Dashboard & Live Metrics) **Page 4**

**Section 3:** Orders Queue & Fulfillment Workflow **Page 5**

**Section 4:** Products & Real-Time Inventory Control **Page 7**

**Section 5:** Categories, Sub-Categories & Storefront Hierarchy **Page 8**

**Section 6:** Kitchen Recipes & Grocery Basket Linking **Page 9**

**Section 7:** Operating Hours, Closures & Emergency Toggle **Page 10**

**Section 8:** Square POS & Payment Gateways **Page 11**

**Section 9:** Staff & Team Access Management (User Handover System) **Page 12**

**Section 10:** Daily Opening & Closing Checklists & Emergency Recovery **Page 14**

**Target Audience Note**

This manual is designed for non-technical team members. No programming or server knowledge is required to operate any function described herein.

# Section 1: Access & Authentication

## 1.1 Accessing the Operations Portal

The store operations portal is completely isolated from the public storefront to maintain operational privacy and protect customer payment records.

- **Login URL:** `https://isaleeeko.ca/admin/login` (or `http://127.0.0.1:8000/admin/login` in local network)
- **Required Credentials:** Your registered staff email address and password.

**1** **Enter Your Credentials**

Type your assigned staff email address and password into the respective fields. If you are using a shared store tablet, do not check automatic browser password saves.

**2** **Click "Sign In to Operations"**

Upon verification, the system will direct you directly into the **Operations Command Center**.

## 1.2 Two-Tier Staff Role Separation

Ìsàlèè Èkó employs a strict two-tier security model to prevent accidental modification of financial keys while allowing store staff full speed on daily fulfillment:

| CAPABILITY / SCREEN | STORE ASSOCIATE ASSOCIATE | STORE MANAGER MANAGER |
|---|---|---|
| **Operations Dashboard** | Full View (Orders, Sales, Low Stock) | Full View (Orders, Sales, Low Stock) |
| **Orders Queue & Packing** | Fulfill, Pack, Complete Orders | Fulfill, Pack, Refund, Complete |
| **Products & Stock Quantities** | Edit Stock Counts & Variations | Full Catalog & Price Editing |
| **Categories & Recipes** | Create, Edit, Upload Photos | Full Hierarchy & Sync Control |
| **Store Hours & Holiday Closures** | View Operating Times | Edit Hours & Emergency Closure |
| **Square Tokens & Payment Keys** | **Hidden (No Access)** | **Full Access** |
| **Staff Roster & Passwords** | **Hidden (No Access)** | **Add, Reset, Deactivate** |

## 1.3 Changing Your Password (Self-Service)

Any staff member can change their password at any time without asking a manager:

1. Look at the top-right corner of the topbar next to your name initials.

2. Click the **Key icon** (`Change My Password`).
3. In the drawer that appears, type your **Current Password**, your **New Password** (minimum 6 characters), and confirm it.
4. Click **Update Password**. Your new credentials take effect immediately.

**Deactivated Staff Security Guard**

If an employee leaves the company and a manager marks them as **Deactivated**, their active session is terminated instantly. Even if they type the correct password, the portal will reject access and display an account suspension notice.

# Section 2: Operations Command Center

The **Dashboard Overview** ( `/admin` ) serves as the morning launchpad and live nerve center for the retail grocery store.

## 2.1 Live KPI Metric Tiles

| SCORECARD TILE | WHAT IT MEASURES | ACTION REQUIRED |
|---|---|---|
| **Today's Gross Sales** | Total revenue from orders placed today in Moncton time (AST). | Review daily sales velocity against store targets. |
| **Orders Placed Today** | Count of new orders received since midnight. | Helps pace kitchen and packaging staffing. |
| **Active Fulfillment** | Orders marked `Placed` or `Paid` awaiting completion. | Must be cleared to 0 before the end of the shift. |
| **Low Stock Alerts** | Number of product items with 5 or fewer units left in inventory. | Alert warehouse suppliers or restock retail shelves. |

## 2.2 Real-Time Store Operating Pill

At the top of the dashboard, a colored badge displays the exact public status of the physical store:

- **• OPEN UNTIL 7:00 PM** — Store is within regular scheduled hours and accepting shoppers.
- **• OPENS AT 10:00 AM** — Store is currently closed overnight; will open automatically at the scheduled time.
- **• CLOSED: HOLIDAY / EMERGENCY** — Scheduled closure or emergency toggle is active.

## 2.3 Urgent Orders Queue (First-In, First-Out)

The dashboard displays the **5 oldest pending orders** that need packing right away. Clicking on any order number takes staff directly into the packing desk.

## 2.4 Low Stock & Depleted Inventory Panel

Displays products where stock is dangerously low (≤ 5 units). If a customer purchases the last item on the storefront, the variation automatically flips to "Sold Out" online to prevent overselling.

# Section 3: Orders Queue & Fulfillment Workflow

Accessible from the sidebar under **Fulfillment & Operations** → **Orders Queue** ( `/admin/orders` ).

## 3.1 Order Lifecycle Stages

| STATUS BADGE | MEANING | STAFF RESPONSIBILITY |
|---|---|---|
| PLACED | Order submitted by customer; payment authorization initiated. | Review order items and begin pulling groceries from shelves. |
| PAID / PACKING | Payment confirmed via Square. Items are currently being packed. | Bag items, verify batch quantities, and print packing slip. |
| READY FOR PICKUP | Customer selected in-store pickup; parcel placed in pickup shelving. | Customer receives automatic pickup notification. Hand over on arrival. |
| OUT FOR DELIVERY | Order handed to local Moncton delivery driver. | Package en route to customer's residential address. |
| COMPLETED | Goods received by customer; transaction finalized. | No further action required. Order archived in history. |

## 3.2 Step-by-Step Order Packing Guide

**1 Locate Order on Queue**

Filter by **Active Orders** or search by customer name, phone number, or 5-digit Order Number (e.g. `#ORD-8291` ).

**2 Open Order Detail Drawer**

Click on the order row. Inspect all requested variations (e.g., "*Yam Tubers (Medium 3-Pack)*" or "*Honey Beans 5kg*") and check any customer delivery instructions.

**3 Pick & Pack Goods**

Collect items from store shelves or freezer. Verify perishable items (meat, frozen fish, plantain) are properly temperature-insulated.

**4 Update Fulfillment Status**

Change status to **Ready for Pickup** or **Completed**. The system records the timestamp and staff audit trail.

**Split Fulfillment Types**

Orders are clearly tagged as either **Local Moncton Delivery** (with street address and postal code) or **In-Store Express Pickup**. Keep pickup bags in the designated pickup counter behind the till.

# Section 4: Products & Inventory Management

Accessible from the sidebar under **Catalog & Content** → **Products & Inventory** ( `/admin/products` ).

## 4.1 Catalog Overview

The products screen lists all grocery items available in the store, organized with their respective brand, country of origin (Nigeria, Ghana, Jamaica, Canada), and price variations.

## 4.2 Managing Product Variations & Stock Counts

African grocery items often sell in multiple formats (e.g., Single Tuber vs 3-Pack; 2kg bag vs 10kg sack). Each format has its own independent stock level.

**1** **Adjusting Stock Quantities**

Click **Edit** on any product. Scroll down to the **Variations & Pricing** table. Directly update the numerical **Stock Quantity** field (e.g., received 25 new bags of Golden Penny Semovita). Click **Save Changes**.

**2** **Setting Featured Status**

Toggle the **Featured on Storefront** checkbox to spotlight seasonal items (like fresh yellow garri or fresh scotch bonnets) directly on the homepage banner.

**Square Inventory Synchronization**

If an in-store customer purchases an item through the physical Square POS register, the web catalog stock reduces in real time to prevent duplicate orders.

# Section 5: Categories & Sub-Categories Hierarchy

Accessible from the sidebar under **Catalog & Content** → **Categories & Sub-Cats** (`/admin/categories`).

## 5.1 Catalog Hierarchy Model

Categories follow a two-tier organizational hierarchy:

- **Parent Departments (Root):** Broad supermarket departments (e.g., "*Flour, Grains & Rice*", "*Spices & Seasonings*", "*Snacks & Drinks*", "*Frozen Meats & Seafood*").
- **Sub-Categories:** Specialized groupings nested beneath parents (e.g., "*Fufu Flour*", "*Poundo Yam*", "*Suya Pepper*").

## 5.2 Adding a New Category

**1** **Click "+ New Category"**

Type the customer-facing name (e.g., "*Dried Fish & Stockfish*").

**2** **Select Parent Department**

If this is a sub-category, pick its parent department from the dropdown. If creating a brand-new top-level department, leave it set to *-- None (Top-Level Department) --*.

**3** **Choose Visual Icon Badge**

Click on any of the pre-configured high-definition icon badges in the visual palette, or type an emoji directly into the icon box.

**4** **Select or Upload Category Photo**

Staff can pick from the pre-loaded **Store Photo Library** with 1 click, or switch to **Upload from Device** to drag and drop a clean JPG/PNG image from a camera or phone.

# Section 6: Kitchen Recipes & Culinary Content

Accessible from the sidebar under **Catalog & Content** → **Kitchen Recipes** ( `/admin/recipes` ).

## 6.1 Why Recipes Drive Grocery Basket Size

Ìsàlèè Èkó recipes are not just cooking instructions — they are an interactive sales driver. When customers view a recipe (like "*Authentic Nigerian Egusi Soup*"), the storefront provides a single **"Add All Ingredients to Cart"** button that adds the exact ground egusi, palm oil, crayfish, and stockfish directly into their basket.

## 6.2 Publishing a Recipe

1. Click **+ New Recipe** in the top-right corner.
2. Fill in:
   - **Recipe Title:** e.g., "*Smoky Jollof Rice (Party Style)*".
   - **Origin / Country:** Nigeria, Ghana, etc.
   - **Difficulty & Times:** Prep time (minutes), Cook time (minutes), and Servings count.
3. **Link Store Ingredients:** For each required ingredient, link it to the actual product item in your store inventory so shoppers can purchase it with one tap.
4. **Cooking Steps:** Type simple, numbered step-by-step instructions.
5. Click **Publish Recipe**. It appears on the public storefront immediately.

# Section 7: Store Hours, Closures & Emergency Toggle

Accessible under **Store Controls** → **Hours & Closures** ( `/admin/hours` ).

## 7.1 Standard Weekly Operating Hours

Configure the physical store schedule for each day of the week (Monday through Sunday). Times operate in the Moncton local timezone (America/Moncton):

| DAY OF WEEK | STANDARD SCHEDULE | ONLINE ORDER CUTOFF |
|---|---|---|
| Monday – Friday | 10:00 AM – 7:00 PM | Pickup until 6:45 PM |
| Saturday | 10:00 AM – 6:00 PM | Pickup until 5:45 PM |
| Sunday | 12:00 PM – 5:00 PM | Pickup until 4:45 PM |

## 7.2 Scheduling Holiday Closures

For statutory holidays (e.g. Christmas, New Year's Day, Canada Day, Thanksgiving), enter the specific date and reason. The storefront will warn customers ahead of time.

## 7.3 Emergency Snowstorm / Weather Closure Toggle

**Emergency Weather Switch**

During severe New Brunswick snowstorms or power outages, Store Managers can activate the **"Emergency Store Closure"** switch. This immediately displays a prominent closure banner across the website and pauses new pickup orders to keep staff and shoppers safe.

# Section 8: Square POS & Payment Gateways

Accessible to Store Managers under **Store Controls** → **Payment Methods** ( `/admin/payments` ).

## 8.1 Payment Channels Supported

- **Square Web Payments:** Secure tokenized checkout for Visa, MasterCard, American Express, and Interac Debit.
- **Cash on Express In-Store Pickup:** Allows shoppers to pay at the physical counter when collecting their order.
- **Interac e-Transfer:** Manual e-transfer payment instructions for local shoppers.

## 8.2 Safe Handling of Square Credentials

The store's Square connection is governed by three secure keys:

1. **Square Application ID:** Identifies your registered Square merchant application.
2. **Square Access Token:** The authorization key that allows the store to charge cards and sync inventory.
3. **Square Location ID:** Identifies your physical retail store register in Moncton.

> **Security Notice for Store Owners**
> Never share your Square Access Token via unencrypted email or text message. Only Store Managers have access to the Payment Methods screen. Store Associates are blocked from viewing these credentials.

# Section 9: Staff & Access Management (Handover System)

Accessible to Store Managers under **Store Controls → Staff & Access** ( `/admin/staff` ).

This dedicated portal was engineered specifically for the client handover so the store owner can independently add new employees, issue passwords, and manage departing staff without calling an IT developer.

## 9.1 Onboarding a New Employee

**1** **Click "+ Add Staff Member"**

In the top-right corner of the Staff Management portal, click the red button.

**2** **Enter Employee Details**

- **Full Name:** e.g., "*Bukola Adeleke*".
- **Email Address:** This will be their unique username to log in (e.g., `bukola@isaleeeko.ca` ).
- **Phone Number:** Optional contact number.

**3** **Select Staff Role**

- `STORE ASSOCIATE` — For cashier, packaging, and kitchen staff. Can fulfill orders and update stock. Payment tokens and staff controls are hidden.
- `STORE MANAGER` — For owners and head managers. Full administrative authority.

**4** **Copy Temporary Password**

The system auto-generates a secure temporary password (e.g. `temp8391!#` ). Click the **Copy** button and send it to the employee via WhatsApp, SMS, or email.

**5** **Employee Logs In & Updates Password**

The employee goes to `/admin/login` , enters their email and temporary password, and uses the key icon in the topbar to change it to their personal password.

## 9.2 Resetting an Employee's Forgotten Password

1. Find the employee in the **Staff Roster Table**.
2. Click **Edit**.

3. In the yellow "*Reset Password*" box, click **Generate Random** (or type a new custom password).
4. Click **Save Changes**. Provide the new password to the employee.

## 9.3 Handling Departed Staff (Deactivation vs Deletion)

- **Instant Deactivation:** Click **Deactivate**. The employee is immediately locked out from the portal. They cannot log in, but their past fulfillment audit logs remain intact.
- **Revoke Access (Delete):** Click the **Trash icon**. If the employee has processed orders, the system automatically revokes all admin rights while preserving order audit history. If no orders exist, the account is cleanly erased.
- **Self-Protection Guard:** A manager cannot deactivate or delete their own active account, preventing accidental lockouts.

# Section 10: Daily Store Checklists & Emergency Recovery

## 10.1 Morning Opening Checklist (15 Minutes Before Opening)

| STEP | ACTION | LOCATION IN ADMIN |
|---|---|---|
| 1 | Sign in to operations portal on the store tablet/counter computer. | `/admin/login` |
| 2 | Check **Store Status Pill** to confirm hours are scheduled for today. | Dashboard Header |
| 3 | Review **Active Fulfillment Backlog** for overnight web orders. | `/admin/orders` |
| 4 | Check **Low Stock Alerts** for items that sold out overnight. | `/admin/products` |
| 5 | Print packing slips for morning pickup slots. | Orders Desk |

## 10.2 Evening Closing Checklist (At Store Closing)

| STEP | ACTION | LOCATION IN ADMIN |
|---|---|---|
| 1 | Verify all orders marked "*Ready for Pickup*" were collected by customers. | `/admin/orders` |
| 2 | Record any delivered local delivery batches as "*Completed*". | `/admin/orders` |
| 3 | Review Today's Gross Sales tile for end-of-day register reconciliation. | Dashboard Overview |
| 4 | Sign out of the operations portal (click door/exit icon in topbar). | Topbar Profile |

## 10.3 Emergency Terminal Recovery (For IT & Developers)

If store managers ever lose all passwords or accidentally lock themselves out, access can be instantly restored in 5 seconds directly from the server terminal without database surgery:

Open a terminal on the host server and run:

```
php artisan staff:create owner@isaleeeko.ca --name="Store Owner" --password="EmergencyPassword123!" --role=manager
```

This command creates or reactivates the account as a verified Store Manager with full access restored immediately.
